

VISCO

Enterprise Software for Importers

Overview

The Venture Information System (VIS) is a web-based software package designed specifically for importers to improve business efficiencies in the areas of venture (shipment) tracking, inventory management, and associated logistics. It can easily be integrated with QuickBooks® to facilitate record keeping and sophisticated financial analysis.

Side-by-Side Rating	Landed Costs	Profit & Loss at Shipment Level	Shipment Tracking	Importer's Document Management	Currency & Unit of Measure Conversion

Are you still tracking your Landed Costs by Hand? The Venture Information System is a web-based Enterprise Software package designed to turn chaos into order!

Our product integrates with QuickBooks 2004 Premier Edition, which has the most comprehensive tools for fast and easy financial management--including tools for business planning, forecasting, and analysis to help you achieve better results. Premier Edition also features advanced accounting and inventory tools that meet your more specialized needs.

QuickBooks and the QuickBooks logo are trademarks of Intuit Inc., displayed with permission.

"Our approach to the development of the Venture Information System was from the sales, financial and logistic perspectives. Rather than beginning with a system for record keeping and accounting; then trying to incorporate inventory tracking and financial analysis, we completely reversed the development process" says VP Tim Peck.

System Requirements

The Venture Information System was developed under the Microsoft .NET Architecture® with integration into Microsoft Office modules including MS Excel®, MS Word® and MS Outlook®.

Recommended Software

Listed below is the software needed for a successful implementation of the Venture Information System:
